

H524 Final Project Proposal Template

Team Name: [Your Team Name]

Team Members: - [Name 1] - [Role] - [Name 2] - [Role] - [Name 3] - [Role] - [Name 4] - [Role] - [Name 5] - [Role] (if applicable)

Submission Date: [Date]

150-Word Proposal

Instructions: In approximately 150 words, describe your project including: (1) research question, (2) data source, (3) statistical method, and (4) planned AI tools.

[Write your proposal here]

Example Proposal

Team StatWizards will investigate whether there is a relationship between daily screen time and sleep quality among college students using Pearson correlation analysis. We will use a publicly available dataset from Kaggle containing survey responses from 500 students, with variables measuring hours of daily screen time and self-reported sleep quality scores (1-10 scale). We plan to use ChatGPT and Claude to help us understand correlation assumptions (linearity, normality), generate R code for analysis and visualization, and interpret our results. We will document all prompts and compare how each AI explains correlation strength and significance. Team roles: Alex (coordinator), Jordan (AI tools), Sam (data/code), Taylor (presentation), Morgan (documentation).

Quick Checklist

Before submitting, ensure your proposal includes:

- ☐ Clear research question
 - ☐ Data source identified (with approximate sample size if known)
 - ☐ Statistical method selected from H524 options (chi-square, correlation, regression, t-test, ANOVA, bootstrap)
 - ☐ At least 2 AI tools specified for comparison
 - ☐ All team members listed with roles
 - ☐ Approximately 150 words (± 20 words is fine)
-

Submission Instructions

1. Save this file as: `TeamName_Proposal.md`
2. Submit to Canvas by Sunday of Week 5 at 11:59 PM
3. One submission per team
4. Be prepared to discuss your proposal in class during Weeks 6-7
